

SECATEUR - ARS PROFESSIONAL BYPASS ROTATING HANDLE

ARS Pro Roll-Handle Secateur, 18cm: ARVS8XR

The ARVSR series provides the same perfection in heavy-duty precision pruning as the ARVS series with the additional advantage of a rotating handle. The rotating handle moves with the fingers as each cut is made, eliminating friction between handle and skin, preventing blisters and reducing fatigue.

- Perfection in heavy-duty precision pruning for orchard, vineyard and horticulture.
- Marquench hardening gives the blades the best steel structure and durable cutting performance.
- Razor sharp, hard-chrome plated blades for rust and sap resistance.
- Counter blade sap groove reduces friction and jamming
- Thicker branches can be pruned with this ergonomic design that permits wide blade opening with a comparatively small grip opening.
- The single-handed squeeze-open-lock system is simple, convenient and secure.
- Ergonomically shaped alloy handles with comfortable PVC grips.
- Rotating handle; the rotating handle moves with the fingers as each cut is made, eliminating friction between handle and skin, preventing blisters and reducing fatigue.
- Available in 3 sizes for correct fit in your hand, ensuring the best grip.
- Quality Japanese manufacture

Replacement blades and other spare parts available.

Code	Size	Length	Weight
ARVS7XR	Small	180mm long	250g
